BEAUTY THAT LASTS A LIFETIME

SOLID SOLUTIONS

BEAUTY THAT LASTS

Whether you prefer the look of traditional or contemporary, we can coordinate an original design that will look beautiful for years

Quarrystone Solid Surface welcomes you to the world of "seamless" luxury. Unlike laminate, granite, marble and quartz which have obvious seams, Quarrystone is a non-porous, bacteria resistant material made of continuous colors and patterns producing a completely seamless installation.

Unlike other brand solid surfaces, Quarrystone mimicks the look of natural stones as well as the traditional look of solid surface.

Quarrystone is perfectly suited for counter tops, back splashes, wet bars, table tops, island units, desks, shower & bathtub surrounds, or as an alternative to any indoor/outdoor wood or tile applications.

DESIGN A COLOR

Quarrystone offers an infinite number of color possibilities. Choose from a group of traditional stock colors or customize by helping us to create a new look that suits your inspiration & decor.

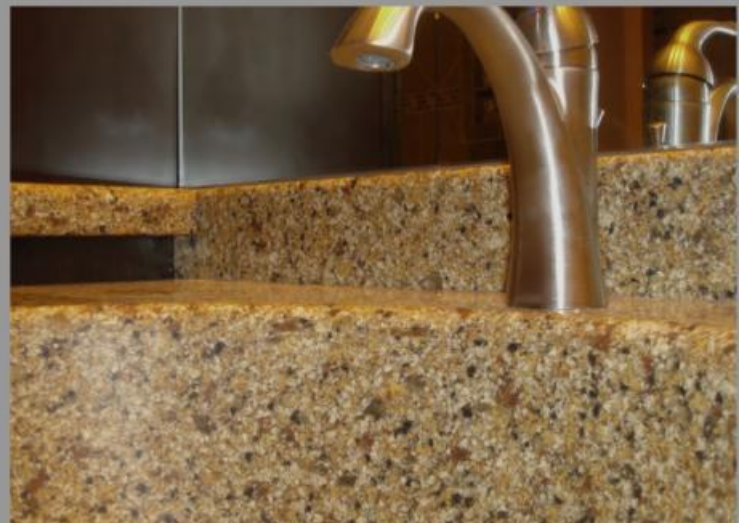

EASY TO CLEAN

Quarrystone's smooth water-resistant surface makes it perfect for shower and bath tub surrounds. There are no grout lines or rough textures to harbor the growth of bacteria.

EXCLUSIVE SEAMLESS DESIGN

Quarrystone state of the art SIMULCAST manufacturing process allows you to custom match sinks and bowls to the counter top. This "continuous color" design feature is truly a work of art.

All Quarrystone sinks and bowls are mounted below the counter surface for a seamless design. No seams or lips means virtually no clean-up.

CUSTOM SHOWER SPACES THAT LAST A LIFETIME

Quarrystone custom shower spaces are practical and beautiful. They are safer for small children and more easily accessible for people with limited mobility. The sturdy floors are hand fabricated with solid 1/2" thick materials with extra reinforcement in all the right places. These durable bases are pitched slightly toward the drain yet flat on the bottom for fast, easy placement directly on the plywood sub-floor. The walls are then installed to your preferred custom height. We can even do the ceiling. It's your space and you have the freedom to have it the way you like. Flat and smooth with no rough textures makes it the easiest to clean and care for.

YEARS WORTH OF MOLD MAY BE FLORISHING BEHIND OLD TILE, TUB & WALL.

BEFORE

AFTER

WE'LL TEAR OUT ALL MATERIALS DOWN TO THE STUDS IF NEEDED.

- SMOOTH ▶
- SEAMLESS ▶
- NON-POROUS ▶
- EASY TO CLEAN ▶
- EASY TO ACCESS ▶
- CONTEMPORARY ▶
- ARTISTIC ▶
- TRADITIONAL ▶
- NO GROUT ▶
- AFFORDABLE ▶
- DURABLE ▶

We finish it off with a beautiful matching vanity top with integral sink and back splash.

PERMANENT BATH ROOM SOLUTION

Create a brand new shower space exactly the way you want it. Don't take the risk of masking potential problems with "band-aid" solutions. We'll remove any bad materials for a fresh start. Our decorative materials double as a vapor barrier. It's smooth and seamless walls versus rough tile surfaces, mudding or grout that may potentially fail in the future.

MATCHING VANITY TOPS

ADA COMPLIANT

TIMELESS ELEGANCE

Quarystone combines the look of granite, marble, quartz and other age old materials with modern day practicality. This achieves a timeless appearance that will last as long as the home that it's installed in.

EASIER THAN TILE

- Quick, clean & easy installations.
- Installs to drywall with silicone.
- No special tile saws are needed.
- Machines with woodworking bits.
- Material is a vapor barrier.
- Endless color variety.
- Easier to clean and maintain.
- Renewable after years of use.

ENDLESS COLOR VARIETY

Nothing beats the custom fit and sleek look of an exquisitely crafted Quarrystone surface. Finish options range from matte to high gloss. The broad array aesthetic includes solid colors (pastel to bold), granite, quartz & marble look-alikes, lightly sanded textures, multi-colored veining, translucent and metallic versions that take on an authentic patina with age. The palette includes every color of the rainbow. Colors can be created and customized to your personal preference.

WHY CHOOSE QUARRYSTONE SOLID SURFACE OVER NATURAL STONE?

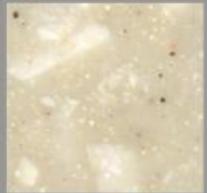

Eliminate the "RADON RISK" with our man-made surface. Inspired by natural stone it is just as beautiful, impressive yet clean & safe.

Small amounts of radon gas are emitted in almost every slab of natural stone. Radon sinks to the floor and can accumulate where small children often play. Radon can be just as dangerous as second hand cigarette smoke. Any porous material that comes from the ground can be filled with microbes or other nasty things you wouldn't ordinarily invite in your home. Solid surface is a clean material that is often specified for use in surgical suites.

MEASURING INSTRUCTIONS: COUNTER TOPS

Measuring kitchen counter tops for an estimate is simple. If you don't have a cabinet plan the most common layouts are shown below. Arrows reveal the dimensions needed for estimates. Note that some shapes may have extended widths. If you have something other than the options shown below simply measure overall length and width and describe the shape as "oval, circle, bean shape, octagon etc."

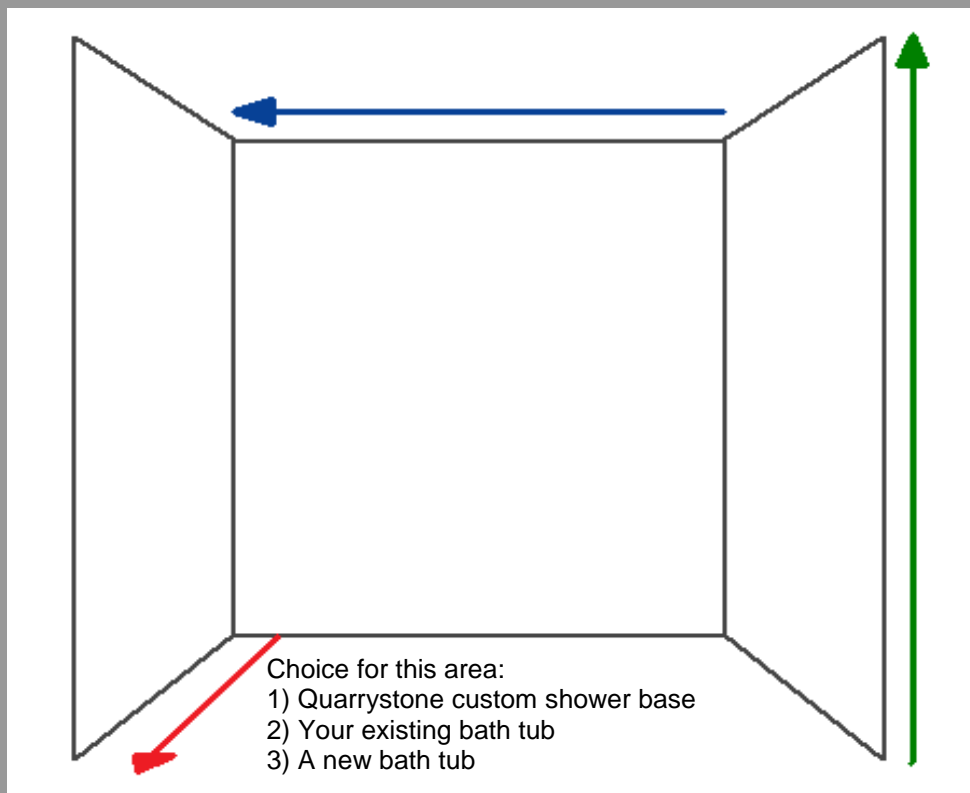

MEASURING INSTRUCTIONS: SHOWER WALLS

To measure for a shower or bathtub area simply indicate the dimensions shown by the arrows. Then indicate if the style is 2 walls, 3 walls (shown right) or 4 walls (include a size for the door way opening). If you have something different like an angled shower or polygon shape then simply indicate the dimensions of each wall. You can also submit a floor plan from your builder or contractor.

Note: Don't hesitate to call for an appointment if you prefer having a professional measure for you!
